

CV#40000551

Consultant

I am an Oracle Financial Functional Consultant and Oracle Certified Specialist (OCS) in the General Ledger Module of both EBS R12 and Oracle Fusion Financials and ACCA Finalist.

I have approximately 5 years' experience. That includes above 4 years' experience Oracle Functional Consultant and more than one year's experience in the field of Financial & Investment Consulting. Besides, my academic qualification is ACCA (Finalist), Masters in Economics and Bachelors in Commerce (B.Com).

My core skills are Oracle Financials with good knowledge Oracle SCM and Oracle Transportation Management (OTM).

- Conducting business and technical studies of the client's current system
- Working with clients to identify, document and validate their business requirements and map them to Oracle ERP system functionality
- Working with clients to document and validate their integration, development and customization requirements and communicating these to technical colleagues.
- Designing, developing, integrating and implementing information systems business solutions
- Working with the client to configure and /or customize Oracle ERP applications to meet their business requirements.
- Assisting the client with data migration activities
- Supporting the client through testing (Integrations and UAT) and imparting training to the end users
- Compiling relevant project documentation as required including but not limited to functional specifications, technical specification, project issue logs, change requests, testing/use cases, training guides
- Providing post implementation support through analyzing and troubleshooting Oracle ERP system issues reported by end users
- Conducting Presales presentations and system demonstration activities

Please also note that I am available to join immediately.
