## PEDIATRIC CLINICAL EXPERIENCE

---

### **Pediatric Intensive Care Unit—Baltimore, MD**

*168 Hours*

*Johns Hopkins Hospital*

- Participated in full patient care under the supervision of nurse preceptor for a wide variety of critically ill and surgical pediatric patients with conditions including congenital cardiac defects, heart transplants, cancer, spinal fusions, spinal cord retethering, end stage kidney disease, shunt revisions, asthma exacerbations, burns, anemia, and cerebral palsy.
- Exposure to working with numerous modalities including halo traction, somatic mirrors, nebulizers, tracheostomies, vents, chemotherapeutics, electroencephalography, EKGs, arterial lines, blood draws, NG/PEG tubes, and TPN administration.
- Collaborated with healthcare team members regarding patient statuses and treatment options, as well as with other nursing staff so as to provide a seamless transfer of patient care.
- Aided in performing admission assessments and discharge teaching for patients and their families.

### **Pediatric Adolescent Unit—Baltimore, MD**

*112 Hours*

*Johns Hopkins Hospital*

- Assessed children from age 13 to 19 years and identified normal and abnormal findings for conditions such as diabetes, sickle cell disease, status post scoliosis and pectus excavatum surgeries, cystic fibrosis, urologic abnormalities, and organ transplant rejections.
- Administered multiple IV, IM, nebulizer, and oral medications, including those through G-tubes.
- Exercised family centered care by educating both children and their parents concerning such aspects of care as infection detection, counting carbohydrates, insulin adjustments, medication adherence, resuming activities following surgery, dressing changes, and preventing sickle cell crisis.
- Accompanied children to the respiratory therapist for pulmonary function tests.

### **Labor & Delivery/Maternal Child Unit—Bel Air, MD**

*112 Hours*

*Upper Chesapeake Medical Center*

- Demonstrated intrapartum and postpartum assessment skills, including maternal and newborn assessments.
- Performed technical skills including interpreting and analyzing electronic fetal monitoring; administered pediatric medications such as the Hep B vaccine and vitamin K.
- Warmed, fed, and changed newborns in postpartum patients' rooms as well as in the special care nursery.
- Observed and helped during both vaginal and cesarean section births, including calculating APGAR scores.
- Provided patient teaching both upon admission and during the postpartum period on breastfeeding, bathing and clothing the infant, infant safety, and resuming activities following labor.

### **Public Health Nursing—Perry Hall, MD**

*112 Hours*

---

*Chapel Hill Elementary School*

- Worked with the school nurse in treating first aid and medical issues including abrasions, nausea/vomiting, ADHD, fever, upper respiratory infections, asthma, lice, fractures, sprains/strains, cystic fibrosis, and type 1 diabetes.
  - Administered medications including MDI inhalers, Adderall, Focalin, Creon, Tylenol, and Benadryl, both on a scheduled and PRN basis.
-
