5. **Assessment of Competence**. College of Pakistan, Lahore, Pakistan
6. **Supervisory Skills**. College of Pakistan, Lahore, Pakistan

SPECIAL SKILLS: (PLEASE LIST DOWN YOUR SPECIAL SKILLS, KNOWLEDGE AND ABILITIES THAT YOU FEEL ARE APPLICABLE TO THE POSITION FOR WHICH YOU APPLIED)

I have more than 15yrs of experience in the field of Plastic and Reconstructive Surgery. I have double qualification i.e. I am a fellow of the Royal College of Physicians and Surgeons of Glasgow and Fellow of College of Physicians and Surgeons Pakistan. Both of these qualifications are awarded only after proper training in recognised institutes followed by clearing exams. I received my earlier training at the department of Plastic Surgery and Burns, Mayo Hospital Lahore, Pakistan. This is a tertiary referral unit for whole of Punjab, and provides services to more than eight million people. Here I received training in general plastic surgery procedures including skin grafting, flap reconstruction, all types of congenital deformities and soft tissue reconstruction. There is a dedicated Burn Unit attached to the unit and I received training managing acute burn patients and treatment of post burn deformities.

My post FRCS training involved working in the best possible plastic surgery centres of UK. During my plastic surgery training I rotated through different units and worked under supervision of highly qualified and experienced surgeons and received training in skin grafting, flap application, pinnaplasty, hypospadias repair, hand trauma, cancer resection and reconstruction, cleft lip and palate repair, cosmetic surgery and breast surgery. I worked at "Mersey Regional Burn Centre" near Liverpool, where I received training in managing acute burn patients. I attended numerous BAPS and BAAPS meetings and received hands on training through attending multiple courses and workshops involving flap reconstruction, microsurgery, cosmetic surgery and hand surgery. During this period I passed my ALS (Advanced Life Support) and ATLS (Advanced Trauma and Life Support) courses.

I have been working as a consultant plastic surgeon since last 10 years. During this period I have independently performed all types of plastic surgery procedures. I established plastic surgery services at Shalamar Teaching Hospital, Lahore. I operated all plastic surgery procedures independently and was involved in multiple joint operations with ENT, Orthopaedic and General Surgeons. I was awarded "Gold Medal" by Pakistan Medical Association in appreciation of my services.

Currently I am working as a Consultant Plastic Surgeon and in charge of Unit II department of Plastic Surgery Mayo Hospital, Lahore, Pakistan. I am providing a general plastic surgery service including routine plastic surgery procedures and also managing difficult reconstructive cases referred from other hospitals and other units. For renal failure patients requiring dialysis I am providing making fistula services.

Besides reconstructive surgeries I am routinely carrying out all types of cosmetic procedures including breast surgery, face lift, rhinoplasty, liposuction, tummy tuck, blepharoplasty, ear surgery and laser hair removal.

I have also developed a Hair Transplant Team and routinely carry out Follicular Unit Hair Transplantation.

I have written numerous research papers in journals and have made many presentations and delivered lectures in scientific meetings. I have always been an active part of audit. During my training at Nuneaton, UK I carried out an extensive audit on management of Basal Cell Carcinoma.

I have always been actively involved in teaching of medical students, medical staff and junior doctors and trainees of plastic surgery. I am enrolled as "Supervisor" in plastic surgery with the College of Physicians and Surgeons of Pakistan (Highest Medical Body for post graduate qualifications in Pakistan) for training post graduate trainees in plastic surgery.

I am a team player and have always enjoyed excellent working relationship with my colleagues, seniors and juniors. I encourage input from all members of the staff in order to provide best possible care to the patients.
